## **Show your support for smoke-free restaurants by patronizing these establishments.**

### **Did you know....**

- According to the Surgeon General's Report on Involuntary Exposure to Tobacco Smoke, there is no risk-free level of exposure to secondhand smoke.
- Concentrations of many cancer-causing and toxic chemicals are potentially higher in secondhand smoke than in the smoke inhaled by smokers.
- Even 30 minutes of exposure to secondhand smoke can cause heart damage similar to that of a daily smoker.
- Every year in Genesee County 109 non-smokers die as a result of exposure to secondhand smoke.
- A 20-year study in England of workers and restaurant/ bar patrons exposed to secondhand smoke found a **50 to 60% higher risk** of coronary heart disease.
- Bar and restaurant employees are 50% more likely than the general population to develop lung cancer.
- The American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE), the preeminent U.S. standard setting body on ventilation issues, has concluded that ventilation technology cannot be relied on to completely control health risks from secondhand smoke exposure.

*For more information about smoke-free environments, secondhand smoke, other tobacco-related issues, or to add your establishment to this list please contact the Genesee County Health Department and the Smoke-free, Multi-Agency, Resource Team (SMART) at (810) 341-5898.*
